

PARTNER SEARCH PUBLICATION FORM

The:

Technology Center of Crafts (CTA), located in the Region of Murcia (Spain)

Is looking for:

Partners to develop a project on cultural itineraries related to crafts in Europe, in order to diffuse the customs and traditions, within the proposed Promotion of trans-national Thematic tourism products in the European Union as Means of Sustainable Tourism Development 12/G/ENT/TOU/11/411B. These itineraries can be physical or virtual. The project may be to gather the most ancient traditions of a given area, then search for folk or craft-related events, linking with the monuments of the area. Eligible consortiums require the partners from at least 4 countries, including at least one public national tourism agency. The centre would be especially interested in the formation of stable networks of cooperation that craftsmen can use as resources for sustainable development of tourism in a region, as well as organizing workshops, conferences, publications, exhibitions and events along the route made.
