

Transnational education alliance

An alliance between local authorities with international orientation

Strategic education alliance, Rodgau

In order to multiply the effects and positive aspects of an education alliance, a concept with international orientation is eligible to initiate: an education alliance between municipalities or districts.

In this regard, Rodgau has been actively involved and is responsible for the process of acquiring potential partners.

For years, the city of Rodgau has been dedicated in promoting innovative projects in the field of education. This originates not only from the well-built infrastructure and numerous institutions for the entire education sector, but also from a very active and civic commitment.

The municipal strategic education alliance has set principles and objectives as followed:

Principles and objectives of the alliance:

- The basic purpose of the alliance is the development and promotion of projects and processes in education and social sectors. The focus is on the promotion of education, the support of skilled workers and innovative approaches in the field of education under municipal responsibility.
- The education alliance is located at the local level with an international orientation.
- The partners are committed to mutual cooperation.
- The partners support each other in the application process for national and transnational federal projects.
- The partners are interested in getting involved in long-term and fixed alliances referring to social issues.

Benefits of the alliance for the partners:

- The joint activities can be politically legitimised.
- It offers a personnel and thematic continuity in the educational landscape.
- The alliance determines a range of objectives and municipal structures can be adapted accordingly.
- The cooperation will create synergy effects for all partners and competencies from the education sector can be bundled.

INTERN

Fachbereich Kommunales Bildungsmanagement

- Setup of a pool with skilled workers.
- The exchange and transfer of concepts (best practice) between countries and local communities can result from this alliance.
- Strengthening of intercultural competence.
