

For an exhibition who should take place in Nantes next May, I am searching a few European citizens who would agree to take some photos of their city (with mobile phone or digital camera). My purpose is to do a kind of board made with those pictures (the capitals only). You would have to go wherever you want in the street but in the center of town and take a photography in front of you, one behind you, one on your right and one on your left (towards the 4 cardinal points). Once done, you'll send me your pictures by email ([lpeneau@gmail.com](mailto:lpeneau@gmail.com)) and precise me the exact location where they have been taken.

Thanking you in advance

Lionel Péneau
