

Associação Insular de Geografia is looking for a partner in Europe in order to participate in the next Call Creative Europe Funding Programme (2014-2020) for small projects in the context of Culture.

Short description:

The project aims at the development of a creative cluster, capable of contributing to employability and inclusion of young people, through a strategy based on knowledge, creativity, innovation and cooperation. Starting with the creation of a favorable local environment, this project seeks to stimulate new cultural and economic circumstances conducive to the development of the creative economy and the establishment of more inclusive social and territorial dynamics vitalities.

The "Madeira Creative Lab" project is based on three fundamental pillars:

- 1 - Laboratory of Ideas: On especially the University Academy, training and research.
- 2 - Incubator: The incubator will allow the development of new ideas, products and businesses through the offer of a set of operating low-cost (physical space, support, legal and financial advisory services).
- 3 - Events: development of events, festivities and traditional markets with the objective to valuing the knowledge, the culture, traditions and cultural exchanges.
